

“What mattered to us was that when we lifted something out, the next package of medicine slid smoothly into the right place ready for the next time we reached for it.”

## Lista Case Study

**Customer:** Freiamt district hospital in Muri (CH)  
**Industry:** Healthcare provision  
**Products:** Drawer cabinets with sloping drawers  
**Main purpose:** Well-organised storage of medicines

## Lista in the hospital pharmacy: Drawer cabinets for storing medicines

Taking medicines from drawers quickly and easily without opening the drawer, thanks to a low-level front to the drawers. A weight then ensures the next package slides forward into the space.

Working in close collaboration with the Freiamt region district hospital in Muri, Lista has developed a drawer cabinet which is specifically designed to meet the needs of a hospital pharmacy.

During the modernisation and reorganisation of the hospital pharmacy in Muri, some clear requirements were defined for the new medicine cabinets. The drawers had to be able to be partitioned flexibly and their contents had to be easily visible. In addition, it had to be possible to pick up medicines without opening the drawers, and be easy to restock them.

### Simple removal without opening the drawer

"What mattered to us was that each time we lifted a medicine out, the next package slid into the right place ready for the next time we reached for it", explained the pharmacy manager. To meet this requirement, Lista developed easy-gliding, sloping drawers with adjustable partitioning and a low front,

from which products could be lifted out without opening the drawers. A weight then ensures the next package slides forward into the space. The double catch – a Lista device which has been certified by NATO – means that the drawer can be unlocked with one hand. A spring stops the drawer pulling all the way out and in combination with the safety catch this prevents the drawer falling out.

### The ideal solution for modern hospitals

Clear labelling on the drawer handles using the Lista Script labelling software also makes handling easier. And the choice of colour was another important factor: because the pharmacy is located in a basement with little daylight, the decision-makers opted for white. Lista's solution appealed to the hospital management: "For a modern hospital like ours, this special design from Lista was the best option – customised top quality at reasonable prices."

## i Benefits

### ■ Quick and easy access to medicines

Reliable removal following the "First-in-first-out" principle, thanks to the weight and the spring device.

### ■ User-friendly

No need to pull out or open up the gliding and sloping drawers, can be operated with one hand.

### ■ Safety

Safety catch and certified double catch can be operated with one hand, for maximum safety.

### ■ Optimal use of space

Freely variable partitioning (slotted drawer bases, and partition elements) and low fronts.

### ■ Simple labelling on the handles

Using the free Lista Script labelling software you can professionally label the drawer handles at minimal cost.

A spring stops the drawer pulling all the way out and in combination with the safety catch this prevents the drawer falling out.

Flexible drawer partitions.

The drawer handles can be labelled using the Lista Script software making it easy to see where everything is, and they prevent cleaning materials getting into the drawers.

Product description		
Product		Special drawer units with sloping drawers
Cabinet dimensions		
External volume W x D x H	mm	1037 x 553 x 2000
Lista units		55 x 27 E
Cabinet elements		Pillar frame 27 E, side walls 27 E, diagonal support or rear wall, universal base 55 E, sloping drawers 54 x 27 E
Colours		12 standard colours
Painting process		Impact and abrasion-resistant surface thanks to environmentally friendly powder coating
Material		Very high durability thanks to a precise and stable construction, made from high quality welded sheet steel
Sloping drawer		
Lista units		54 x 27 E (Price on request)
Usable area W x D	mm	918 x 459
Front height (usable height)	mm	50 (32.5), 75 (57.5), 100 (82.5)
Pull-out type (Max. load per drawer)	(kg)	Full extension (75 or 200)
Special adapter		0 and 15 degrees
Safety catch		Double catch and retaining spring
Drawer colour		12 standard colours (inside and out)
Drawer material		Very high load-bearing capacity thanks to a precise and stable construction, made from high quality welded sheet steel
Other features		Individually locking drawers with safety catch, efficient usability thanks to 100% use of available volume and freely definable partitioning
Warranty		
		10 year warranty, GS-certificate (safety tested), can be extended at any time as items come with guaranteed availability for 10 years
